

Looking for invertebrates

Name _____ Class _____

You are going to look for some invertebrates. Good places to look are in flower beds, under hedges and in piles of dead leaves.

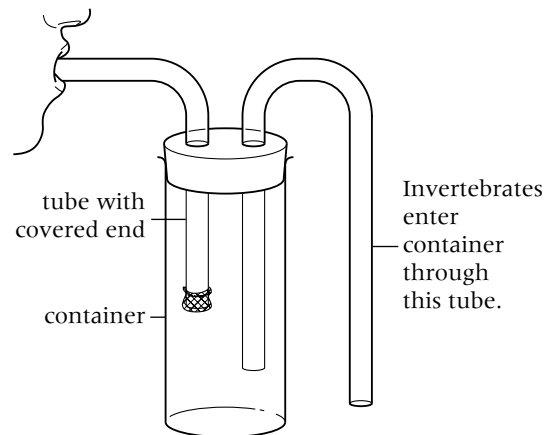

P You must handle invertebrates carefully. You could use a **pooter**.

If you suck on the tube with the covered end, small animals end up in the container.

Only suck on the tube with the covered end.

Do not try to suck up animals that will not easily fit through the tube.

Do not put your hands near your mouth while doing this work. Wash your hands after doing the experiment.

Results

Choose a place to look for invertebrates. Try to identify them. Fill in the table below.

Name of area you looked for invertebrates: _____

Name of invertebrate	What invertebrate group they are in
